HUMANITARIAN WORKS ASSOCIATION (HWA)

STRATEGIC CIVIL SOCIETY BLUEPRINT & COMMUNITY ACTION PLAN (2026–2027)

Legal Registration: Prefectural Charter No. 1229/G.37/C84/Vol.1/A3/SAAJP (Cameroon)

Director: Ange Princwill Nfor | princeange95@gmail.com

Official Portal: <https://google.com>

Headquarters: Isokolo Mokindi, Limbe II, Fako Division, South West Region, Cameroon

ORGANIZATIONAL OVERVIEW

The Humanitarian Works Association (HWA) bridges the gap between advanced digital infrastructure and grassroots community care. By replacing obsolete manual logging with centralized cloud database tracking templates, HWA eliminates resource distribution bottlenecks, ensures absolute transparency, and delivers precise aid to vulnerable networks.

CORE OPERATIONAL PILLARS & RESOURCE ALLOCATION

1. Academic Equity & Scholarships

- Technical Objective: Identify, audit, and fulfill primary academic scholarships for 150 underprivileged children using automated verification manifests to track school attendance, textbook delivery, and tuition allocations in real-time.

- Human Resources & Knowledge: Managed by a dedicated sub-committee of local educational volunteers and teachers who conduct the community verification interviews. HWA provides digital literacy training and internet access cards to field staff to ensure smooth database data entry.

2. Child Welfare & Resource Logistics

- Technical Objective: Deploy localized mobile input sheets for field volunteers to rapidly register vulnerable households and streamline data collection points.

- Food & Healthcare Execution: HWA secures raw food provisions, basic healthcare kits, and hygiene supplies through strategic resource-sharing partnerships with local community health clinics, agricultural cooperatives, and verified regional wholesalers. Registered logistics supplies are systematically packaged, logged into the cloud database for compliance, and distributed directly via volunteer delivery routes to verified households.

3. Public Sanitation & Dialogue Workshops (Peace via Dialogue)

- Technical Objective: Track neighborhood sanitation metrics across 300+ households using database tracking sheets to identify environmental hot-spots.

- Workshop Execution: Mobilizing youth volunteer teams to execute weekly door-to-door public hygiene campaigns. These campaigns utilize structured sports engagement and civic dialogue modules—mentored internationally under European "Peace via Dialogue – Boxing for Peace" frameworks—to reduce regional youth delinquency, foster community trust, and promote lasting civic stabilization.

FUTURE EXPANSION ROADMAP & PARTNERSHIPS

HWA actively collaborates with external civil society actors, community leadership boards, and international advisory mentors to ensure our on-the-ground operational logistics match global standards. Our immediate technical goal is to secure international cloud partnerships to scale our data-security encryption, keeping our grassroots field-delivery tracking fully protected from cross-border data compromise.
